

# Flag Label System

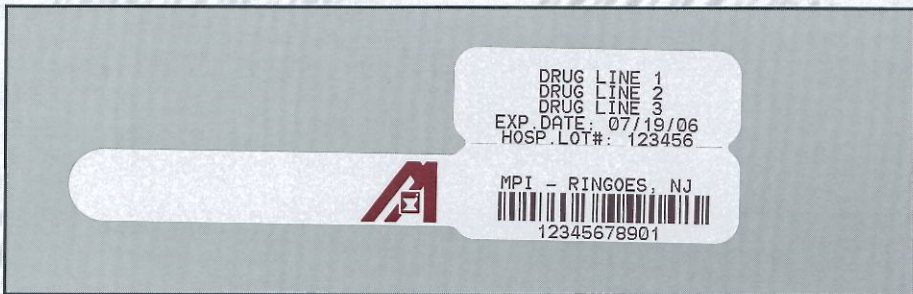

Utilizing MPI's Pharmacy Accessory Label Printer (PALP) and WinPakUD Software, this convenient Flag Label solves the Pharmacy's labeling needs for vials, ampoules, syringes and other items distributed from the pharmacy that require a bar code and label.

MPI's Flag Label solution provides a double-sided print area that allows both a bar code and 6-lines of text on an individual label. The label is easily removed from its backing and applied to the product in one swift motion.

The label has a combined print area of 1 1/2" x 1" utilizing both sides of the label.
