

AUTO-PRINT® MAX BAGGER

For use with Centralized Robotic Systems

Manufactured by Sharp Packaging Systems

DECREASE PACKAGING COSTS

INCREASE OPERATIONAL EFFICIENCY

REDUCE MEDICATION ERRORS

Auto-Print® Max Bagger for Robot Ready Packaging

is an over-wrap packaging system for printing and packaging parenteral medications and produces a package capable of fitting in standard centralized, robotic drug distribution systems.

AVAILABLE VIA SPECIAL ORDER ONLY.

Sharp MAX Series

MPI's **Auto-Print® Max Bagger** is an over-wrap packaging system for printing and packaging parenteral medications and is capable of working with a centralized, robotic drug distribution system. It provides the capability of loading, printing, bar coding and sealing ancillary parenteral medications in just a few simple steps. Bags are blown open through an internal fan, which channels high volume, low pressure ducted air into the bag for easy product loading. Labeling and bar coding is done directly on the bag, eliminating costly labels and allowing for customization of bar coding and packaging procedures specific to the requirements of each facility.

MPI's **Auto-Print® Max Bagger** assists the pharmacy in decreasing costs by offering automated loading, printing, bar coding and sealing in a minimal amount of steps virtually eliminating incorrectly labeled bagged medication. The **Auto-Print® Max Bagger** also increases efficiency by allowing the technician to seal and advance the bag via foot pedal controls. All labeling and barcoding is printed directly on the bag prior to filling and sealing, eliminating the need to manually affix a label to the bag.

MPI's **Auto-Print® Max Bagger** is powered by MPI's exclusive **Pak-EDGE™ UD Barcode Labeling Software**, which is capable of generating and printing all linear, 2D and GS1 barcodes and offers advanced barcoding capabilities and configurations, which typically includes product NDC code, local expiration date and date packaged. In the event of a product recall, Pak-EDGE™ can easily trace the packaged product so the pharmacist can take immediate corrective action to remove the product from inventory.

Packaging parenteral medications in **MPI's Auto-Print® Max Bagger** ensures that an easy to open, unit dose package containing detailed medication and barcode information is produced and will be delivered to the bedside each and every time, ensuring patient safety.

KEY FEATURES

- Packages up to thirty (30) filled and sealed bags per minute.
- Two standard size bags available:
 - 3 ½" x 4" and 5" x 5"
- Programmable PLC Control
- 6" Color Touch Screen Control Panel
- Obstruction Sensor Pressure Bar
- Automatic or Foot Control Operation
- Pedestal Design with Locking Casters for Easy Maneuverability
- Self-Diagnostics
- Digital Temperature Control
- Off-the-shelf Standardized Maintenance Parts
- Minimal Cost Per Dose (CPD)

TECHNICAL SPECIFICATIONS

Dimensions:	46" W x 39" H x 39" D
Weight:	300 lbs.
Power:	115VAC, 50/60Hz, 15 Amps
Air Requirements:	80 PSI, ¼" Quick Disconnect
Rate:	Up to 30 Doses/Minute

All MPI packaging systems are classified as US FDA 510(k) exempt and require the use of MPI authorized disposable materials.
